

## Green technology in the beauty industry

Beauty salon is a women territory, and, of course, every woman wants to be surrounded by beautiful things. That is why, every beauty salon must create a unique and stylish interior design in order to attract as many fair sex representatives as possible. If the beauty salon will be clean, stylish, fashionable, then the client will definitely come

back. However, at a time when all the people are concerned with the environmental problems, even such an important issue as the attractive interior design becomes of a secondary importance, as more attention is paid to the use of green technology in the beauty industry.

Of course today all beauty salons, trying to create the best conditions for their clients, use environmentally friendly building materials in the construction and decoration of the salon premises. Still, it is just the first step on the way of creation green beauty salon.

Nowadays customers of numerous hairdressers and beauty salons lay down more serious demands to the level of services provided.

The quality of services depends on many factors. Still the most important among all of them is the quality of equipment used by hairdressers,

manicurist, cosmetologist, makeup artist in their activity (hairdressing tools, cosmetology instruments, [hair removal lasers](#), pedicure armchairs, chairs, footrests, bracket, sinks, driers etc.).

Nowadays, many manufacturers offer eco-friendly equipment designed to meet all customers needs and preserve valuable natural resources. Today, leading companies,

which are engaged in manufacturing of different types of specialized equipment for beauty salons, such as [IPL machine](#) and other, focused their attention on the problems of environmental pollution. That is why such companies use environmentally friendly products in the process of the equipment production. So, know conscientious owners of numerous beauty salons are able to purchase everything, starting from chairs and hairdresser washing, ending with mirrors and reception desks made of ecologically friendly materials.

All the materials that are used in the production of these beauty salon furniture, equipment, [omnimax](#) machines - polyurethane upholstery, paint coatings, natural wood and stone, are certified and provided with sanitary-epidemiological conclusions, confirming their safety for human health and the environment. In addition, such specialized is subject to subsequent safe disposal.

Achievements of modern technology allowed the hair and beauty salon to work with the latest professional tools and equipment, organic cosmetic products, use new materials and techniques to meet all the needs and wants of their clients. Today is the time when much attention is paid to the environmental components of the work of beauty industry. And, it is necessary to note that salon equipment made of environmentally friendly materials (such as natural wood) is actually about the safety and care of the client, and concern for the future disposal of furniture and accessories used in the work of the salon. And it is definitely the sign of the beauty salon status and prestige.
